Vapor mass was coming from residual NAPL even if NAPL was not being recovered. That residual NAPL may now be submerged.

Why do you assume the vapor mass is coming from outside the TTZ?

Subject: Re: Today's call

Thanks. I'm glad we got to submit the last set of comments arguing against shutting down the extraction system. If the lawyers are on, it will be interesting if Terra Therm is on the call or not.

FYI, I will be in Palm Springs at a Battelle conference next week. I know that Terra Therm and Amec (Stu) will be there. I have a platform presentation on SVE at an Army Corps site. My two co-authors are from Amec Portland, ME office. No relation to the Williams project.

On 5/19/2016 12:08 PM, Steve Willis wrote:

We had a call this morning on the other Williams sites and AMEC had their lawyers on the call. We had no notice that lawyers were going to be there, so Wayne said we couldn't participate. Then they said the lawyers were only there to listen in and weren't going to "participate", so we went ahead with the call, but we didn't offer any opinions, etc. I expect that the lawyers will be there this afternoon also. Wayne put a call in to ADEQ counsel to see if they want to participate on the call, or let us know how they want us to proceed. So at this time, if AMEC lawyers are there, I anticipate we will be listening, but not offering any comments, opinions, etc. I'll let you know if that changes.
